Bruce A. Lee

brucelee352@gmail.com · brucea-lee.com · linkedin.com/in/brucealee

Technologies:

Languages: SQL · Python · R · **Databases & Warehouses:** BigQuery · Amazon Athena · duckDB · **Data Engineering:** dbt · Data Modeling · APIs · SFTP · SSL · **LLMs:** Claude Code: hooks, agents · **Tooling:** Git · Docker · Airflow, Fivetran

Experience:

Independent Data & Analytics Work
Self-Directed **October 2022 — Present**

- Built an end-to-end healthcare insurance analytics pipeline in Python, transforming raw data into interactive Dash dashboards that answer coverage and cost questions for the non-technical.
- Developed a labor-market analytics dashboard analyzing U-3 / U-6 underemployment and overqualification trends, served through Python and Dash.
- Authored reusable Python data tooling, including an automated SFTP file-transfer utility and a job-listings scraper that structures postings into clean, analysis-ready datasets.

Data Integration Engineer
Finalsite **March 2024 — January 2026**

- Engineered SQL and Python data pipelines, reducing data discrepancies by 30% and improving reporting reproducibility.
- Designed normalized BigQuery schemas to manage structured data for audit-readiness across multi-client environments.
- Documented transformation logic and reporting definitions, creating well-documented processes for cross-functional teams.

Data Integration Manager
Branching Minds **July 2021 — October 2022**

- Built analytical views in PostgreSQL and Amazon Athena to support cross-functional reporting.
- Implemented data validation and reconciliation logic that reduced reporting rework by 40%, strengthening metric reliability.
- Partnered with business stakeholders to define reporting requirements and translate data outputs into operational decisions.
- Standardized reporting workflows across large, multi-source datasets, ensuring consistency and reproducibility.

Customer Success Manager
Vocabulary.com **August 2019 — May 2021**

- Developed customer and product analytics using Salesforce and Tableau, contributing to a 25% reduction in churn.
- Created dashboards and visual narratives to communicate product usage trends, behavioral patterns, and outliers to stakeholders.
- Analyzed product usage, survey responses, and NPS data to identify adoption gaps and feature performance, supporting evidence-based recommendations for K–12 learning tools.
- Maintained a 96% client approval rating by ensuring reporting accuracy and clear communication of analytical findings.

Data Analyst
AMI Kids Inc. **August 2018 — June 2019**

- Produced standardized KPIs and compliance metrics in Excel for a federally funded program (DOE, DOL, DJJ).
- Made reporting for 3,000+ participants across 21 sites, ensuring reporting accuracy and audit-readiness.
- Presented program outcomes to stakeholders in narrative form to illustrate pain points across sites in Florida.
- Analyzed longitudinal program data to identify performance trends and operational risks, supporting funding continuity.

Education:

Georgia Institute of Technology — Atlanta, GA
Master of Science in Analytics — Expected Graduation, Fall 2028

University of Central Florida — Orlando, FL
Bachelor of Arts, Sociology
